Tools of The Mind that you learn to use with us

In our coaching work with clients, we have learned that we achieve better results when we use a variety of methodologies in alignment with the client's personality. One set of tools hardly ever works. We offer all we know to our participants to help them achieve the same and more. Do you want a great platform to start your business to achieve magnificent results immediately?

☑ ***Neuro Linguistic Programming (NLP) : Modules 1 & 2***

NLP is the Art and Science of Instant Change. It is a 'how-to reach success' methodology. We and many others have learnt that NLP is the most powerful way to make immediate and long-lasting changes in one's life, in any area of life, be it career or profession, business, family, relationship, or health. As Certified NLP Practitioner, you learn the many skills and tools of the mind to assist your clients to make the changes they need to accelerate their performance to the peak.

☑ ***Timeline Therapy Techniques™ and Creating Your Future Coaching Techniques™ : Module 3***

May be the world's most advanced methodologies for human change and transformational coaching. These techniques allow your clients to let go of negative emotions and limiting decisions from the past in just a few minutes. You will then learn to coach clients to create goals embedded at the unconscious level so that they simply have to succeed.

☑ ***The Language and Behaviour Profile (LAB Profile)–'Words That Change Minds' : Module 4***

LAB Profile Coaching is an informal, yet highly skilled coaching methodology, which has a structure. Listening to the client's language, you will know how they behave in similar situations in the future.

The vast majority of coaching happens outside of the "official" coaching session, in the hallway, at the end of a phone call, or as a 'by the way' at the end of a meeting.

The LAB Profile is a way of thinking about people that allows you to notice and respond with just the right influencing language. It is tailored to each situation and structured to allow you to understand how people get motivated, how they process information and how they make decisions.

☑ ***Certified NLP Coach : Module 5***

NLP Coaching brings your skills to the peak. You gain the proficiency on how to use all skills learnt to assist your clients at a totally new level. You will understand the power of all the tools offered in the other modules and how to apply those to your coaching approach. Moreover, you will learn how to position and market yourself and your services to others, be it in-house or in your own practice.

☑ ***Optional Inclusion: Hypnosis : Module 6***

Hypnosis is an effective technique that can promote accelerated human change. For many, the hypnotic trance state brings a sense of deep mental inner peace, allowing the mind to reach a place of balance that has been disturbed by the effects of stress and anxiety. We accept that not everybody intends to learn hypnosis. As such participation in this training module is voluntary.
